

Microsoft® Publisher® 2013

Introduction

Course Description

Course Overview: Microsoft® Publisher is a desktop publishing software application capable of producing greeting cards, certificates, newsletters, and other printed publications. Publisher offers a large selection of "building blocks" that can be dragged into your documents, helping you to create page elements such as calendars, newsletter sidebars, and borders. Publisher integrates mail merge features, which is handy when you need to send publications to a list of customers, and it's possible to export publications as HTML web pages or PDF documents. With a user-friendly interface, Microsoft Publisher makes it easy to create and edit publications.

Target Student: This course is intended for persons in a variety of job roles such as publishing specialists, layout specialists, graphic designers, or any other knowledge workers who need to use Microsoft Publisher 2103 to create, lay out, edit, and share publications.

Course Objectives

Upon successful completion of this course, students will be able to:

- Perform basic tasks in the Microsoft Publisher interface.
- Add content in a publication.
- Format text in a publication.
- Edit the contents of a publication.
- Add and format graphics.
- Print and share a publication.
