

Microsoft® Outlook® 2019 Advanced

Course Description

Course Overview: Every day, millions of email messages are exchanged among people within and between organizations. Email has a ubiquitous presence in the lives of many, and it's likely that email technologies will continue to evolve with the changing needs of workplaces. After all, email communication has not been replaced, or its growth slowed, as many predicted with the rise of social media and the widespread adoption of mobile technologies. Many organizations have implemented mail management systems that combine the back-end power of Microsoft® Exchange Server and the front-end intuitive user interface of Microsoft® Outlook® 2019.

In this course, you will customize command sets, configure mail accounts, set global options, perform advanced searches, apply filters to intercept mail and control spam, create rules to automate many management tasks, work with calendars and contacts, manage tasks, protect data with archiving and data files, as well as share and delegate access to your workspaces. In short, you'll work with a wide range of features and options and, in so doing, understand why Outlook is a leading personal management system.

This course builds upon the foundational knowledge presented in the *Microsoft® Outlook® 2019: Introduction* course and will help you customize a communication system well-suited to your work styles. In addition, this course will help you prepare for the Microsoft Office Specialist (MOS) Certification exam for Microsoft Outlook 2019.

Target Student: This course is intended for people who have a basic understanding of Microsoft® Windows® and want to know how to use Outlook's advanced features to manage their email communications, calendar events, contact information, search functions, and other communication tasks.

This course covers the Microsoft Office Specialist Program exam objectives to help you prepare for the Outlook Associate (Office 365 and Office 2019): Exam MO-400 certification exam.

Prerequisites: To ensure your success in this course, you should have end-user skills with any current version of Windows, including being able to open and close applications, navigate basic file structures, and manage files and folders. Additionally, it will benefit you to have basic Outlook skills. You can obtain these skills and knowledge by taking the following CompuTrain course:

- Microsoft® Outlook® 2019: Introduction

Course Objectives

In this course, you will use Outlook's advanced features to customize and manage your email communications, including using advanced features to organize emails; managing calendar settings and options; managing contact information; scheduling tasks; and managing Outlook backups and data file settings.

You will:

- Insert objects in messages, and modify properties and global options.
- Organize, search, and manage messages.
- Protect your mailbox and manage its size.
- Use rules and Quick Steps to automate message management.
- Work with advanced calendar settings.
- Import and forward contacts.
- Manage activities by assigning tasks to others.
- Delegate access to and share Outlook items with others.
- Archive and back up Outlook items using data files.

Microsoft® Outlook® 2019

Advanced
